

**THE SMALL-SCALE INITIATIVES PROGRAM  
FOR CIVIL SOCIETY ORGANISATIONS IN  
NORTH AFRICA**

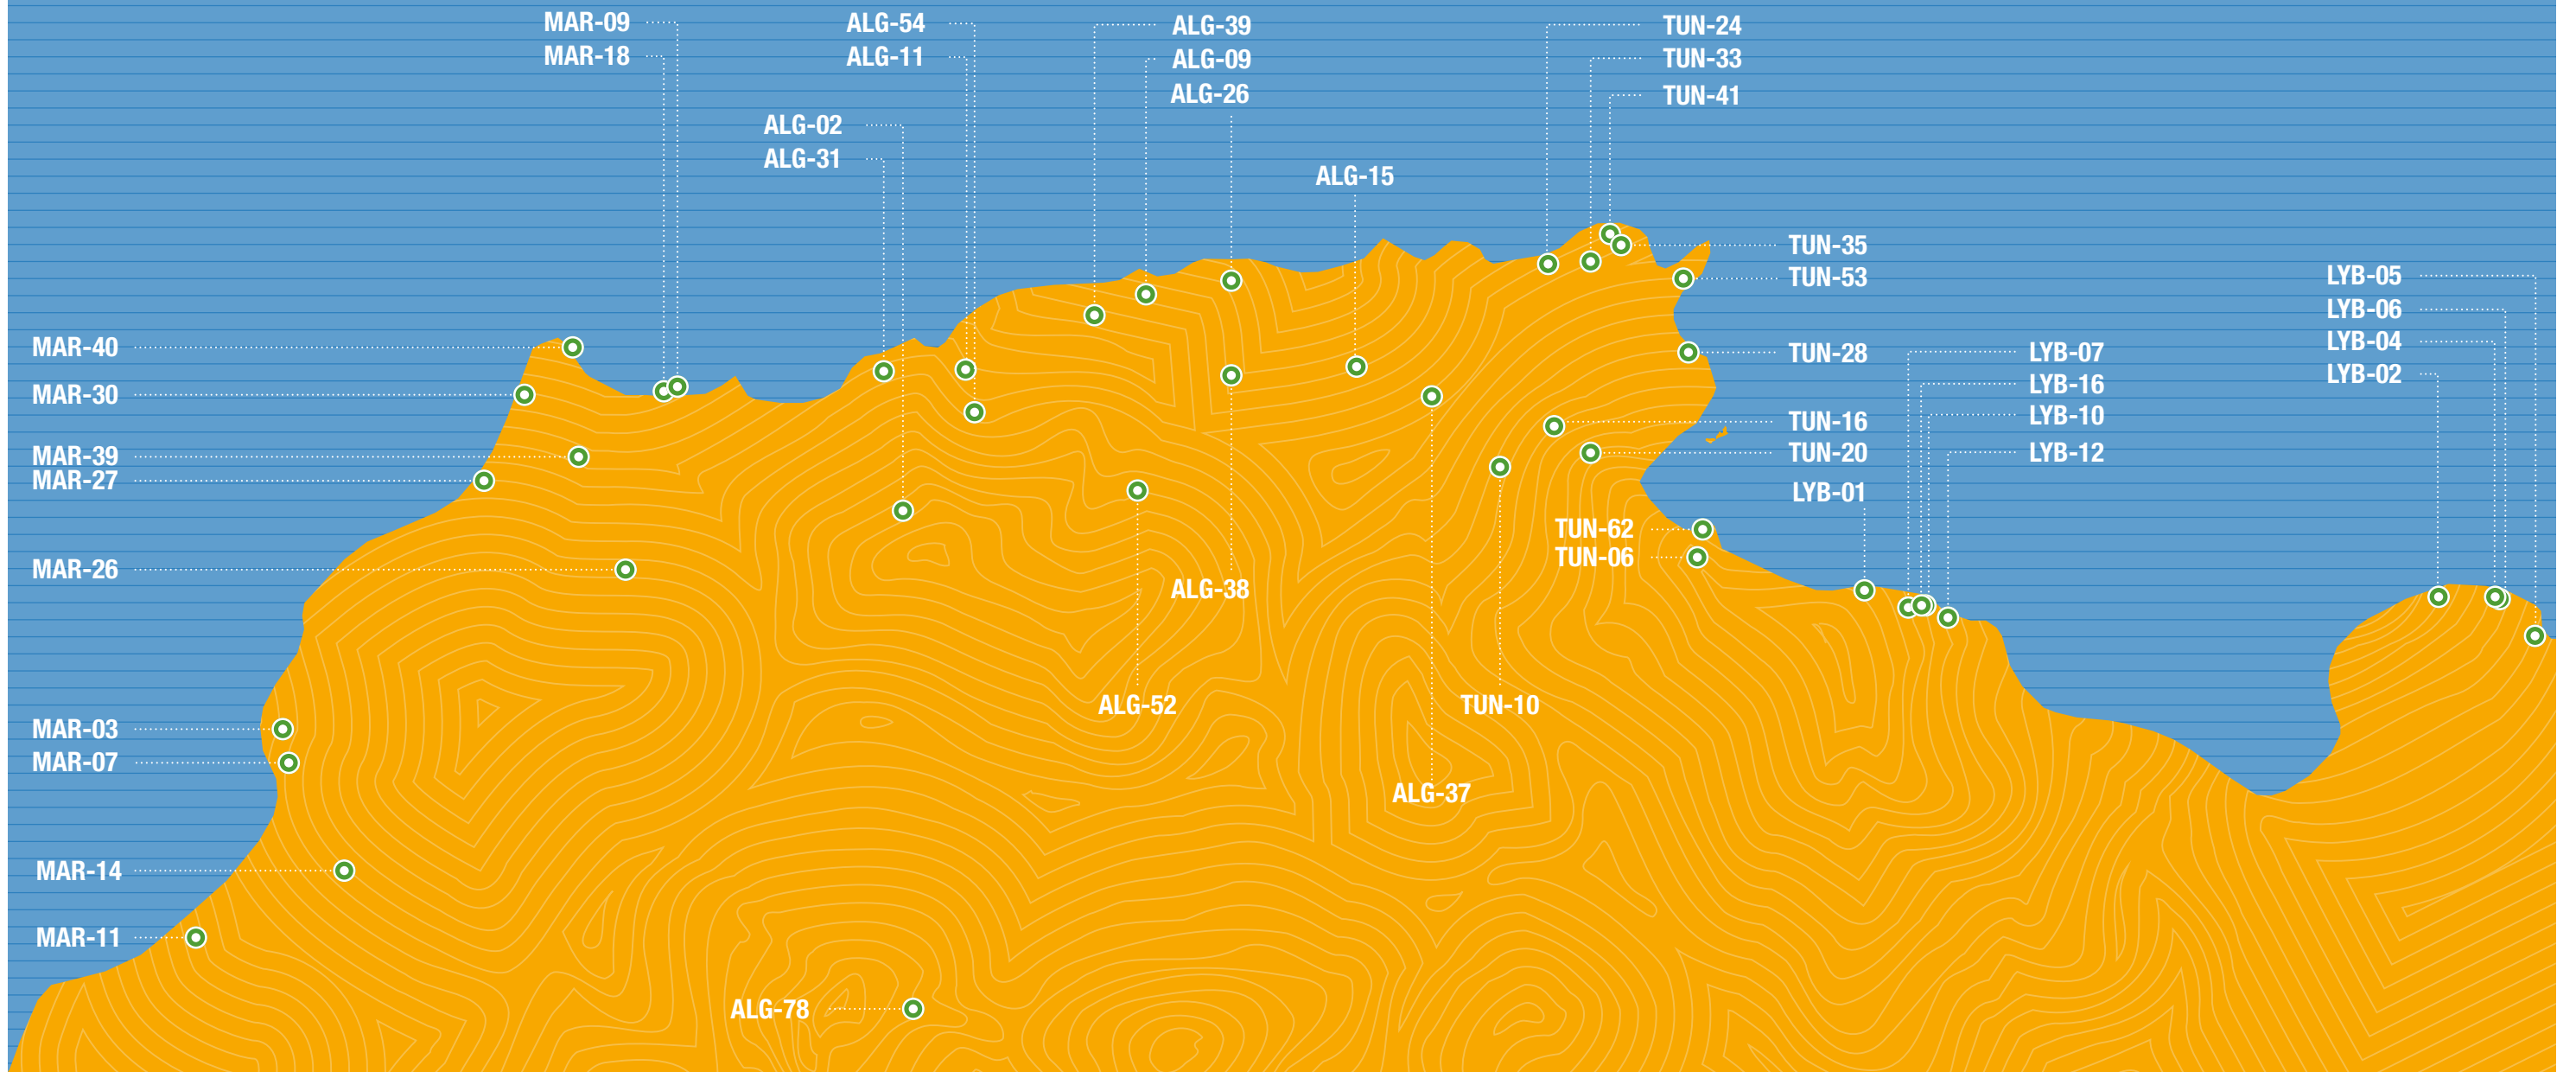

**2018-2021**

---

# Small-scale Initiatives Program for Civil Society Organisations in North Africa

## MOROCCO

- MAR-03** 🌿 Setting up a bee yard
- MAR-07** 🌿 Valuation of the ecotourism appeal of the Anezi territory natural and cultural heritage
- MAR-09** 🌿 Development of ecotourism in Al Hoceima National Park
- MAR-11** 🌿 Valorisation of the ecotourist values of the biodiversity of Khenifiss National Park.
- MAR-14** 🌿 Valorisation of the futur National Park «Deraa Ouargziz Labtana» biodiversity
- MAR-18** 🌿 Valuing the natural resources of Al Hoceima National Park
- MAR-26** 🌿 Preservation and sustainable development of the Oriental

## High Atlas National Park

- MAR-27** 🌿 Creation of a geospatial database and GPS tracking of raptors in Morocco
- MAR-30** 🌿 Saving the great bustard (Otis tarda) from extinction in Morocco
- MAR-39** 🌿 Implementation of the Zerhoun SIBE project
- MAR-40** 🌿 Assessment of threats on emblematic birds in northwest Morocco

## ALGERIA

- ALG-02** 🌿 Restoration of fragile ecological systems in Ain Sefra
- ALG-09** 🌿 Contribution to the preservation of the endemic bee Apis Mellifera Intermissa

## ALG-11

- ALG-11** 🌿 Macta wetland enhanced by sustainable local ecotourism
- ALG-15** 🌿 Contribution to the conservation of biodiversity in Belezma National Park
- ALG-26** 🌿 Conservation of the thaghzouth-Thawint area's natural heritage
- ALG-31** 🌿 Preservation of the DOUEIMA wetland
- ALG-37** 🌿 Preservation of the Atlas Cedar in Mount Chélia
- ALG-38** 🌿 Development of ecotourism in the Boussaâda region
- ALG-39** 🌿 Restoration and preservation of Miliana Garden
- ALG-52** 🌿 Construction of a small

## conservation farm for endangered species

- ALG-54** 🌿 Biological corridor for the preservation of the Cuvier's Gazelle.
- ALG-78** 🌿 Oughename Garden

## TUNISIA

- TUN-06** 🌿 Promotion of alternative maritime tourism in the Zarzis region
- TUN-10** 🌿 Chott El Djérid ecotourism itinerary
- TUN-16** 🌿 C.H.E.R.E Gafsa
- TUN-20** 🌿 On the Footsteps of Tunisia's Stealth Predators
- TUN-24** 🌿 Contribution to the preservation of the Bni Mtir forest through the development of ecotourism

## TUN-28

- TUN-28** 🌿 ECOOLIVA
- TUN-33** 🌿 Contribution to the establishment of an ecological observatory in the Medjerda River
- TUN-35** 🌿 Environmental Corridors within the Oued Tine
- TUN-41** 🌿 Preservation of medicinal plants in the Region of Bizerte- Teskreyra and Oued Zitoun
- TUN-53** 🌿 FloraWetS
- TUN-62** 🌿 Djerba Up

## LIBYA

- LYB-01** 🌿 Together for the sustainable development of the coastline
- LYB-02** 🌿 Restoration of a burned forest

## LYB-04

- LYB-04** 🌿 Environmental awareness in schools
- LYB-05** 🌿 Libyan Natural Biodiversity Relief Centre
- LYB-06** 🌿 Together to strengthen the natural heritage of Wadi Al Naqa
- LYB-07** 🌿 Contribution to Mislata National Park Management Plan
- LYB-10** 🌿 Naqaza residents participate in the reintroduction of endangered species
- LYB-12** 🌿 Restoration of Sifanes water sources
- LYB-16** 🌿 Illustrated Guide on Mislata and Al Khoms plants

## THE PPI-OSCAN PROGRAM

The Small-scale Initiatives Program for Civil Society Organisations in North Africa, also known by its French acronym PPI-OSCAN, is a Program that aims to support young Civil Society Organisations (CSO) in the development of innovative initiatives which address the environment and sustainable development issues in North Africa.

The overall objective of PPI-OSCAN is to strengthen the technical, administrative and financial capacities of CSOs in four North

African countries (Algeria, Libya, Morocco and Tunisia). The short-term impact would be an increase of CSO initiatives, which in the long-term, would contribute to the implementation of national strategies and action plans for biodiversity conservation and restoration, sustainable management of natural resources and mitigation of climate change effects.

## WORKING THEMES

Interested Civil Society Organisations from the 4 target countries, submitted project proposals in line with the 3 following themes of the program:

**Conservation of species and ecosystems**

**Co-management of land and marine protected areas**

**Ecotourism and sharing of the benefits of conservation**

### PROJECTS

Since the program launched in 2014, two calls for proposals have led to 471 submissions, out of which, 80 projects were selected in the 4 target countries.

#### 1<sup>st</sup> PHASE

PPI-OSCAN  
(2014 - 2017)  
248 projets presented  
37 projects selected

#### 2<sup>nd</sup> PHASE

PPI-OSCAN  
(2018 - 2021)  
223 projets presented  
43 projects selected

The program is currently in its second phase. This brochure aims to present the 43 selected projects and their related associations.

## STRATEGIC OBJECTIVES

1. To support projects on biodiversity conservation and valuation, sustainable natural resources management and climate change mitigation.
2. To strengthen CSOs administrative, technical and financial capacities.
3. To network CSOs and strengthen their capacity for dialogue with governments.
4. To capitalise and disseminate experiences nationally and regionally.

## THE ADDED VALUE OF PPI-OSCAN

1. The promotion of the local, economic and social development of North African countries and building CSO capacity to actively and effectively participate in the sustainable development.
2. Its exemplary and innovative character regarding its supporting and capacity-building approach.
3. Its achievements can be both demonstrated and replicated at national and regional scales through the networking of CSOs and the promotion of dialogue opportunities with institutions.
4. Its global contribution to the environment preservation by focusing on priority fields of intervention in the target countries.

## RESPONSIBLE FOR IMPLEMENTATION

### IUCN Centre for Mediterranean Cooperation (IUCN-Med)

The International Union for the Conservation of Nature (IUCN) today represents the largest environmental network, with over 1,300 government and non-government members operating in 51 countries, in the world. Created in 1948, it is considered to be the largest and oldest organisation working for the protection and preservation of nature. The Union operates as a platform where governments, businesses,

NGOs, experts and local communities work together to implement solutions to address environmental challenges. The IUCN Centre for Mediterranean Cooperation, which opened in 2001 in Malaga (Spain), aims to encourage and assist Mediterranean societies in integrating the conservation of natural resources with their use through the adoption of a sustainable development model.

<https://www.iucn.org/regions/mediterranean>

## FINANCIAL PARTNERS OF THE PROGRAM

### The MAVA Foundation

Founded in 1994 in Switzerland, MAVA Foundation for Nature, is a private foundation for the conservation of biodiversity for the benefit of humans and nature, that funds, mobilises and strengthens the conservation community in Switzerland, the Mediterranean and West Africa. It works in partnership with

international, national and local NGOs, research institutions, universities, and sometimes government agencies. MAVA is in its final phase of operations and plans to cease funding in 2022.

<http://mava-foundation.org/>

### FONDS FRANÇAIS POUR L'ENVIRONNEMENT MONDIAL

### The French Global Environment Facility

The French Global Environment Facility (FFEM) supports innovative environmental projects in developing countries. Created by the French government in 1994 after the first Earth Summit, it has already supported 333 projects in more than 120 countries, two-thirds of which are in Africa. FFEM works in partnership with public, private and civil society actors, both from South and North continents, and other donors and international organisations. It funds

projects that generate local environmental, social and economic benefits, and operates in the areas of biodiversity conservation, climate, international waters, land and ozone layer, and chemical pollution mitigation. The particular value of the FFEM is: to rely on pilot projects to create learnings and disseminate their innovations on a larger scale.

<https://www.ffem.fr>

## NATIONAL PARTNERS OF THE PPI-OSCAN

**ALGERIA - Ministry of Environment and Renewable Energy with the General Forest Directorate**

**MOROCCO — Department of Water and Forest**

**LIBYA — Environment General Authority**

**TUNISIA — Ministry of Local Affairs and Environment with the General Forest Directorate**

**ALG-02****Restoration of fragile ecological systems in Ain Sefra**

The project contributes to the reintegration of the endemic species *Stipa Tenacissima* and *Pistacia Atlantica*, through a gene bank collection. It will facilitate their dissemination and regeneration by pastoralists in a closed area. Activities on young education and public awareness will also be carried out.

📍 Ain-Sefra, Naâma, South-West Algeria  
Total budget: **27.700 €**  
PPI-OSCAN Subvention: **18.000 €**

**Association "The Green Earth"**

This association was created in 2018 from the initiative of local environmental executives. It aims to preserve the natural heritage whilst promoting cooperation and long-term citizens solidarity.

✉ terreverte45@hotmail.com

**ALG-09****Contribution to the preservation of the endemic bee *Apis Mellifera Intermissa***

The project aims to tackle the uncontrolled hybridisation of local bee populations while preserving the endemic species. Stations for controlled fertilisation will be created, as well as a local advocacy group including residents, associations, scientists and public institutions in the field of beekeeping.

📍 Blida, Atlas Blidéen, Nord Algérie  
Total budget: **52.020 €**  
PPI-OSCAN Subvention: **34.120 €**

**Association for the Development of beekeeping in Mitidja Blida (ADAMB)**

This OSC works with public and private actors for the preservation of the beekeeping heritage of the Atlas Blidéen and the valorisation of its local products. It was one of the beneficiaries of the PPI-OSCAN1.

✉ hamzaouimohammedadambli09@gmail.com

**ALG-11****Macta wetland enhanced by sustainable local ecotourism**

The project aims to combat activities threatening this wetland classified as Ramsar in 2001 and IPA in 2016. It promotes ecotourism and educational activities that raise general public and student awareness on the importance of this type of ecosystem as a wintering and nesting habitat for migratory birds.

📍 Macta wetland, Mascara, west Algeria  
Total budget: **40.000 €**  
PPI-OSCAN Subvention: **28.000 €**

**Green Association of Mascara**

This association was created in 2015 to promote education and ecotourism. Activities consist of raising awareness, training and involving local inhabitants in agriculture, forestry and environmental projects.

✉ assoc.verte@gmail.com

**ALG-15****Contribution to the conservation of biodiversity in Belezma National Park**

The project aims to enhance the preservation of the Belezma National Park, one of the most important biodiversity hotspots, in partnership with the management team, local inhabitants and the environmental directorate. It will lead to the establishment of an observatory and ecomuseum on local biodiversity.

📍 Belezma National Parc, Batna, East of Algeria  
Total budget: **42.460 €**  
PPI-OSCAN Subvention: **29.722 €**

**Biology, Biodiversity & Sustainability Association**

This local association works for the socio-economic and environmental development of the region. It focuses on biodiversity conservation and the quality of landscapes with high biological interest.

✉ si\_bachir@yahoo.fr

**ALG-26****Conservation of the thaghzouth-Thawint area's natural heritage**

The project contributes to the conservation of the Taghzouth-Thawint area through the promotion of the rational use of water, rehabilitation and the preservation of water sources and local plants such as the laurel. It also focuses on beekeeping and raising awareness about the environment.

📍 Tizi-Ouzou, Ohadhias, North Algeria  
Total budget: **39.700 €**  
PPI-OSCAN Subvention: **27.800 €**

**Environment Association of Tachemlit**

This association was founded in 2014. Its actions include environmental research, sensitisation on wetlands protection, and the promotion of ecotourism and mountain sports.

✉ mwanec@yahoo.fr

**ALG-31****Preservation of the DOUEIMA wetland**

The Doueima wetland and its ecosystem services are under threats of unsustainable activities from the surrounding farms. The project aims to classify the wetland on the RAMSAR list to ensure its protection, and raises farmers' awareness about organic farming to reduce the use of fertilisers and pesticides.

📍 Hammam Bouhadjar, Aïn Temouchent, west of Algeria  
Total budget: **13.536 €**  
PPI-OSCAN Subvention: **9.475 €**

**Echourouk association**

As a member of several networks related to nature protection and birds watching, it works for nature conservation, especially wetlands, through awareness-raising activities, training, and the practice of ornithology.

✉ p.e.a.echourouk@gmail.com

**ALG-37****Preservation of the Atlas Cedar in Mount Chélia**

The project aims to tackle the degradation of the cedar from Chelia forest through planting activities, raising awareness among residents and students about the environment, and enhancing beekeeping. It will support the classification of the area under the status of National Park.

📍 Mount Chelia, Khenchela, East Algeria  
Total budget: **20.504 €**  
PPI-OSCAN Subvention: **14.352,80 €**

**The Cedar Association for Environment Protection and Sustainable Development**

Created in 2018, it contributes to nature preservation, sustainable development and eco-citizenship by organizing raising awareness events, promoting ecotourism and responsible agricultural practices

✉ cedre.kh@gmail.com

**ALG-38****Development of ecotourism in the Boussaâda region (mountain area, steppe area and wetland)**

The objective is to reduce impact of visitors on the Boussaâda region by creating a warning system on damages caused to biodiversity, in partnership with the University of M'Sila and students from the environmental education program. It will also include activities on capacity building for local CSOs.

📍 Boussaâda, steppe area in the North of Algeria  
Total budget: **22.142 €**  
PPI-OSCAN Subvention : **15.500 €**

**Moubadara Association for Social Development**

Created in 2013, this association benefited from the PPI-OSCAN 1. It carries out scientific and educational activities on sustainable development to create intellectual groups and encourage young graduate empowerment.

✉ mobadara@outlook.fr

**ALG-39****Restoration and preservation of Miliiana Garden**

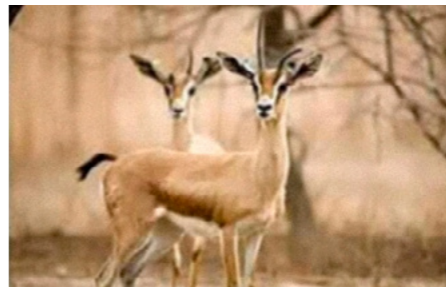

The project aims to reinforce the irrigation system in the Miliiana Garden created in 1860, and contributes to its classification as a «Botanical Garden» through an advocacy group. This would foster the conservation of key species such as the sequoia (the only specimen in Algeria), ginkgo, lime and yews.

📍 Mount Zaccar, Miliana, North of Algeria  
Total budget: **30.000 €**  
PPI-OSCAN Subvention: **21.000 €**

**The pearl of Zaccar**

This local association was created in 2013 in order to protect the environment and to improve the livelihoods of Miliana citizens.

✉ perleduzaccar@outlook.com

**ALG-52****Construction of a small conservation farm for endangered species**

Creation of a small farm of Dorax gazelles as an educational space for young people and the preservation of this local specie and other endangered ones. Actions directed at local authorities will also be carried out to improve the governance and protection of the environment.

📍 Tadjrouna, Laghouat, South of Algeria  
Total budget: **28.000 €**  
PPI-OSCAN Subvention: **19.600 €**

**Association « L'Epi d'Or »**

This association was created in 2013. It carries out raising awareness activities to sensitise the local population on environmental protection, natural resources, and particularly endangered species.

✉ baitdillali@gmail.com

**ALG-54****Biological corridor for the preservation of the Cuvier's Gazelle.**

The project focuses on the conservation of the Cuvier's gazelle through the installation of a natural corridor, the development of water sources, the establishment of a monitoring system in partnership with the forest service, the sensitisation of the population and the education of young people.

📍 Saïda, west of Algeria  
Total budget: **23.300 €**  
PPI-OSCAN Subvention: **16.310 €**

**Affak Tanmiyat EIMouhit**

This local association was created in 2013 for the protection of the environment and vulnerable ecosystems, promoting eco-citizenship, citizen participation, and environmental education.

✉ affak@hotmail.fr

**ALG-78****Oughename Garden**

The objective is to enhance the natural and cultural heritage of Ouled Yahia Oasis in Tamentit, classified as RAMSAR Site. It will promote ecotourism and local crafts, the protection of the dune and natural resources and the empowerment of local governance.

📍 Tamentit, Adrar, South of Algeria  
Total budget: **30.000 €**  
PPI-OSCAN Subvention: **21.000 €**

**Foggara d'Aghmoul**

This local association was created in 2017 for the preservation and promotion of cultural and natural heritage of the Oasis of Tamentit. Within that area, it puts special attention to the maintenance of the Foggara.

✉ espoirdz.01@gmail.com

**LYB-01**  
Together for the sustainable development of the coastline

The project area is located within 110 km of coastal areas, east of the capital Tripoli. Activities are aimed at supporting national efforts to conserve marine and coastal ecosystems by raising awareness and updating information on the condition of current natural resources.

📍 Eastern Tadjourah City  
Total budget: **28.006,00 €**  
PPI-OSCAN Subvention: **19.604,20 €**

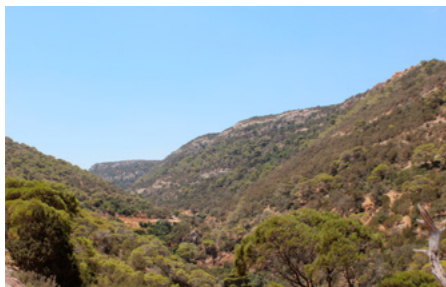

**Libyan Marine Science Association**

As a member of the Maghreb marine science society, this association works with actors from the public and private sector to preserve the marine ecosystem through activities such as raising awareness and conducting scientific studies.

✉ dawhaddoud@yahoo.com

**LYB-02**  
Restoration of a burned forest

The objective is the restoration of a forest ecosystem of 301 hectares in the Cyrenaica region, which represents 25% of the total plant species affected by the fires occurring in 2013 and 2014. The project includes awareness-raising activities, water retention practices and reforestation of these areas.

📍 North of Shahhat City  
Total budget: **70.698 €**  
PPI-OSCAN Subvention: **30.000 €**

**New Libya**

This association works for the conservation of forests and their resources through the use of modern technologies. It works in partnership with international partners and institutions to improve local socio-economic conditions.

✉ libya@thenewlibya.org

**LYB-04**  
Environmental awareness in schools

The project targets 25 public and private schools in the city of Derna through visits on nature conservation both in the field and in schools. It implements interactive activities to educate students about local environmental issues and how to deal with them.

📍 The city of Derna  
Total budget: **38.428,58 €**  
PPI-OSCAN Subvention: **26.900 €**

**Alkhadra Association for Environmental Activities**

Created in 2018 by young activists volunteering for the environment, this association denounces local environmental problems and works for nature conservation and sustainable development.

✉ abodybodhab@gmail.com

**LYB-05**  
Libyan Natural Biodiversity Relief Centre

The project aims to reduce illegal trafficking of animal species. It is situated in Libya's eastern border, which is home to one of the main routes of illegal wildlife trade. The actions focus on raising awareness and creating a rescue centre to shelter and reintroduce intercepted species to their habitats.

📍 Qasr al Jady  
Total budget: **39.285,71 €**  
PPI-OSCAN Subvention: **27.500 €**

**Alhaya Organisation for the Protection of Marine and Wildlife Organisms (Botnan Branch)**

Created in 2016, this association contributes to sustainable management and environmental awareness efforts, with a focus on wildlife protection.

✉ muktarmashri@gmail.com

**LYB-06**  
Together to strengthen the natural heritage of Wadi Al Naqa

The village of Basas located in the Wady Alnaga Valley, has a rich natural and cultural heritage. The project will focus on nature conservation, sustainability of natural resources, a search for solutions to climate change and associated economic challenges in a fragile ecosystem.

📍 City of Derna  
Total budget: **39.877,15 €**  
PPI-OSCAN Subvention: **27.914 €**

**Alhaya Organisation for the Protection of Marine and Wildlife Organisms**

This association was one of the founders of the Libyan Union for Biodiversity and Climate Change and has worked with IUCN since 2016. Its actions focus on the participation of young people and women in nature conservation.

✉ organizationalhayat@gmail.com

**LYB-07**  
Contribution to Mislata National Park Management Plan

The objective of the project is to implement IUCN's recommendations for the planning of protected areas to address the problems of representation and coordination between the sectors in charge and to propose a management plan for the National Park. It will perpetuate the results and products derived from PPI-OSCAN 1.

📍 Alkhazen Village - Alshafien  
Total budget: **57.029,50 €**  
PPI-OSCAN Subvention: **39.920,65 €**

**Libyan Wildlife Trust**

Is member of the Libyan Union for Biodiversity and Climate Change, and a beneficiary of PPI-OSCAN 1. It works in partnership with international organisations, governments and CSO for wildlife conservation.

✉ info@lwt.ly

**LYB-10**  
Naqaza residents participate in the reintroduction of endangered species

The project aims to restore the ecosystem of Al-Naqaza National Park through the implementation of an irrigation system for hillsides, planting plants containing ecological and economic values, taking measures to reduce fire risks and the introduction of a digital data archiving system to ease decision-making.

📍 Al-Naqaza National Park  
Total budget: **40.000 €**  
PPI-OSCAN Subvention: **27.999,51 €**

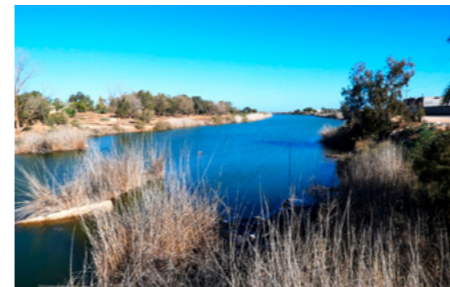

**Alcader Association for Environmental Studies and Media**

Created in 2018, it seeks to improve the conservation of the environment and to introduce modern technologies in the field of nature conservation. Its actions focus on promoting researches and technologies related to nature.

✉ alcader.nga.ly@gmail.com

**LYB-12**  
Restoration of Sifanes water sources

Located in a coastal area of 20 hectares, Ain Kaam is a water source threatened by the accumulation of debris and rubbishes. Project activities aim to improve the conservation of the area through an inventory of the natural resources, its recognition as a valuable wetland and the promotion of ecotourism.

📍 The city of Zliten  
Total budget: **42.000 €**  
PPI-OSCAN Subvention: **29.400 €**

**Shahed Zliten Association for Development**

Created in 2012, the association contributes to education of communities and awareness of the environmental and human impacts. Its plastic recycling project is recognized and supported in many cities across the country.

✉ phi.ass.zl@gmail.com

**MAR-03**  
Setting up a bee yard

Setting up a bee yard for the Saharan bee to support cooperatives of beekeepers and rural residents. The project promotes the conservation of regional biodiversity by promoting an ecological and economic balance between intensive and extensive production systems.

📍 Tizi Ntakoucht  
Total budget: **42.856 €**  
PPI-OSCAN Subvention: **29.999,20 €**

**Union APINECTARDEV**

Union of cooperatives created in 2016, with the mission of improving the living conditions of members, valuing and marketing local products and safeguarding the local bee species.

✉ apinectardev@gmail.com

**MAR-07**  
Valuation of the ecotourism appeal of the Anezi territory natural and cultural heritage

Through the promotion of the cultural and natural heritage of the Anezi region, this project aims to enhance responsible tourism and improve local economy. It intends to raise awareness among local actors about the need to preserve this heritage in order to achieve long-term and sustainable benefits.

📍 Tnine Aday  
Total budget: **17.925,82 €**  
PPI-OSCAN Subvention: **12.548,07 €**

**Adrar Association for Development, Mountain Tourism and Ecotourism**

Created in 2018, it promotes sustainable tourism in the mountains through the integration and sensitisation of local people.

✉ aadtme@gmail.com

**MAR-09**

**Development of ecotourism in Al Hoceima National Park**

Project activities include training courses on diving for professionals as a strategy to develop a new ecotourism product, to identify diving spots in the Al Hoceima National Park, and to monitor the Grouper species known for their role in marine ecosystems and the park's touristic value.

📍 Al Hoceima  
Total budget: **42.450,10 €**  
PPI-OSCAN Subvention: **29.715,07 €**

**Grouper Association of Diving, Environment and Aquatic Sports**  
Created in 2016, it promotes eco-responsible tourism, education in diving, protection of the marine environment and monitoring of the Mediterranean coastline in collaboration with scientists.  
✉ ampesaassociation@gmail.com

**MAR-11**

**Valorisation of the ecotourist values of the biodiversity of Khenifiss National Park**

Creation of an observatory of birds from the Moroccan Atlantic Sahara and organisation of activities to raise awareness, educate on the environment and promote the National Park. The outcomes aim to stimulate bird tourism and improve the living conditions of local fishermen.

📍 Tarfaya, Southern Morocco  
Total budget: **57.055,24 €**  
PPI-OSCAN Subvention: **39.938,67 €**

**Khenifiss Association Network**  
This association was founded in 2012 and benefited from the PPIOSCAN-1. It promotes the development of ecotourism, biodiversity conservation and environmental education in the Khenifiss National Park.  
✉ associationkhnifiss@gmail.com

**MAR-14**

**Valorisation of the futur National Park «Deraa Ouargziz Labtana» biodiversity**

Creation of an information and interpretation centre for Saharan ecosystems, and reinforcement of the reception infrastructures in the future Park. These actions aim to raise local peoples awareness about ecosystems and biodiversity in the Park, in order to integrate them into its management and conservation.

📍 Labouirat  
Total budget: **42.000 €**  
PPI-OSCAN Subvention: **29.400 €**

**Akhzan Association for Development and Cooperation**  
Created in 2008 for the development of the area, it works since 2016 for the creation of the national park to protect local biodiversity, and for the creation of an ecological village to integrate local people.  
✉ akhzan.dev@gmail.com

**MAR-18**

**Valuing the natural resources of Al Hoceima National Park**

Project objectives are to create a nursery of aromatic and medicinal plants, and to implement participative actions of restoration with Thuya of Berbéria and other indigenous species of the area. Such activities will provide sources of income for women as an alternative to the ones threatening the National Park.

📍 Bné Yitif Snada  
Total budget: **42.292,80 €**  
PPI-OSCAN Subvention: **29.604,96 €**

**Al Amal Association for Women's Development**  
Created in 2007, it encourages micro-projects of agriculture in the National Park for women and young people, and their training in the protection of cultural and natural heritage.  
✉ asso\_al\_amal@yahoo.fr

**MAR-26**

**Preservation and sustainable development of the Oriental High Atlas National Park**

The project aims to reinforce ecotourism and the monitoring of mouflon in the National Park. Activities will include, the development of reception facilities, capacity building of young people and women, the promotion of local initiatives for sustainable development and nature awareness.

📍 Ait Yahya  
Total budget: **41.525,26 €**  
PPI-OSCAN Subvention: **29.067,68 €**

**Tadrart Association for mountain development**  
Created in 2009, this association promotes the sustainable development of the mountainous region. It raises awareness about environmental protection and provides training for young women in arts and crafts.  
✉ association.tdrartdev@gmail.com

**MAR-27**

**Creation of a geospatial database and GPS tracking of raptors in Morocco**

The project aims to conserve birds of prey species through the creation of a network for raptor recovery, the installation of GPS trackers and the reintegration of individuals into their natural environment. The tracking and associated database will facilitate species conservation efforts.

📍 The whole country  
Total budget: **42.758,73 €**  
PPI-OSCAN Subvention: **29.931,11 €**

**Moroccan Association for Falconry and Raptor Conservation**  
Created in 2016 and as a member of the International Falconry Association since 2017, this association is specialised in the monitoring and conservation of birds of prey in Morocco.  
✉ amfcr@yahoo.com

**MAR-30**

**Saving the great bustard (Otis tarda) from extinction in Morocco**

The project aims to reinforce the great bustard monitoring efforts and combat the current threats on its last habitat in Morocco and Africa. The actions will refer to the recommendations of the national strategy for safeguarding and include raising awareness activities for civil society and hunters.

📍 Kanouat, Aroua, Chekbouchan, Tendafel, Tleta-Rissana, Mrhitane and Had-Kourt  
Total budget: **42.207 €**  
PPI-OSCAN Subvention: **29.544,90 €**

**Nature Solutions Association**  
This association was created in 2017 to enhance the conservation of Morocco's natural heritage. It carries out actions to strengthen the resilience of ecosystems and populations in the face of climate change.  
✉ a.nature.solutions@gmail.com

**MAR-39**

**Implementation of the Zerhoun SIBE project**

The project includes the establishment of a platform for the classification of the Zerhoun SIBE as a protected area. It will first carry out a global diagnosis of the SIBE to propose specific actions and projects on sustainable development and environmental education.

📍 Moulay Idriss Zerhoun  
Total budget : **57.143 €**  
PPI-OSCAN Subvention : **40.000 €**

**IFKER Association for Environmental Education and Sustainable Development**  
This association was created in 2014 and benefited from the PPIOSCAN1. It promotes environmental education, ecotourism and responsible income-generating activities.  
✉ associationifker@gmail.com

**MAR-40**

**Assessment of threats on emblematic birds in northwest Morocco**

The project aims to assess the factors threatening raptors in the northwest of Morocco, one of the country's most important bird migration corridors, and provides recommendations to address them. It also raises awareness amongst local farmers, and hunters about these factors.

📍 Belyounech, Taghramt and Ksar Sghir  
Total budget: **25.075,60 €**  
PPI-OSCAN Subvention: **17.552,92 €**

**Moroccan Association for the Protection of Birds and Wildlife**  
This association was created in 2017 for the conservation of migratory birds and their habitats. It organises campaigns and carries out scientific studies for the reintroduction of the species into their natural environment.  
✉ ampovis@gmail.com

**TUN-06**

**Promotion of alternative maritime tourism in the Zarzis region**

This project aims to enhance the fishery heritage of the Zarzis region. It promotes good practices in fishery and maritime tourism for the sustainable exploitation of ecosystem services.

📍 Zarzis  
Total budget: **23.000 €**
